

WEEKLY PROJECT PROGRESS REPORT (WPPR)–

For week commencing 7 March 2026

Programme: BCA (Artificial intelligence, Cloud Computing & Devops)

Student Name: mohammed shan.s

WPPR: 5 Register Number: 23BCAICD066 Internal Guide's Name: Deepthi

MAJOR PROJECT Title:

Design and Development of Natural Language Interface for Agriculture Infrastructure

Targets set for the week:

The targets for this week were to implement the fertilizer recommendation feature based on crop requirements. This included adding crop-related data such as nutrient values and developing calculation logic to determine fertilizer quantities.

Progress/Achievements for the week:

During this week, the fertilizer calculation feature was successfully implemented by incorporating crop-related data such as NPK values. The required formulas were applied to calculate the correct amount of fertilizer based on user input.

The system was tested with different crop inputs to ensure accurate calculations and proper output generation. This feature improved the practical usability of the chatbot by providing realworld recommendations. Integration with the existing system was also completed, ensuring smooth interaction between modules.

16-05-2026

Future Work Plans:

In the upcoming week, the focus will be on adding weather updates and market price features. These functionalities will be integrated into the system to enhance its capabilities. Additional improvements will be made in response generation, and integration testing will be carried out to ensure smooth performance.
