

WEEKLY PROJECT PROGRESS REPORT (WPPR)–

For week commencing 7 March 2026

Programme: BCA (Artificial intelligence, Cloud Computing & Devops)

Student Name: mohammed shan.s

WPPR: 6 Register Number: 23BCAICD066 Internal Guide's Name: Deepthi

MAJOR PROJECT Title:

Design and Development of Natural Language Interface for Agriculture Infrastructure

Targets set for the week:

The targets for this week were to enhance the system by adding additional functionalities such as weather updates and market price information. The plan included integrating these features into the chatbot and improving overall response generation.

Progress/Achievements for the week:

During this week, the weather feature was successfully implemented using simulated data, allowing the system to provide basic weather information to users. In addition, the market price functionality was developed, enabling users to check crop prices through the chatbot.

Both features were integrated with the existing modules, resulting in a more complete and functional system. The response generation process was further improved to ensure that outputs are clear, structured, and informative. Testing was performed to verify that all features work correctly together without errors.

23-05-2026

Future Work Plans:

In the upcoming period, the focus will be on completing the final stages of the project, including thorough testing and validation of all implemented features. Any remaining issues or minor bugs will be identified and resolved to ensure smooth system performance. The user interface will be refined further to improve overall usability and presentation.

Additionally, complete project documentation such as the Low-Level Design (LLD), reports, and presentation materials will be finalized. The system will be reviewed to ensure it meets all project requirements and is ready for submission. Preparation for the final demonstration and presentation will also be carried out.
